

## Facts About Evoclin™

### About Evoclin

- Evoclin (clindamycin phosphate) Foam, 1%, is a topical antibiotic in a temperature sensitive foam vehicle (VersaFoam®), for the treatment of acne vulgaris.
- The novel foam formulation, used once-a-day, is easy to apply and leaves minimal to no residue—characteristics that make it easy to spread anywhere on the body, including the chest and back.

### How it Works

- Evoclin should be applied once daily for 12 weeks, covering the affected areas after the skin is washed with mild soap and allowed to fully dry.
- Clindamycin inhibits the growth of *P. acnes*, the bacteria that produces acne vulgaris.

### Marketing Information

- Evoclin was approved by the U.S. Food and Drug Administration on [Date].
- Evoclin will be marketed directly to physicians and health care professionals by Connetics Corporation.
- Connetics Corporation is a specialty pharmaceutical company focused on the development and commercialization of innovative therapeutics for the dermatology market.

## **Evoclin Clinical Data**

- The clinical data supporting FDA approval of Evoclin resulted from a randomized, double-blinded, multi-center trial of more than 1,000 patients age 12 and older. In the non-inferiority study the results indicated that Evoclin produced a reduction in total lesions by 43% (n=386) versus 36% (n=385) for the reference listed drug clindamycin phosphate gel 1% and 31% (n=127) for vehicle foam (placebo), ( $p < 0.05$  for all values).
- Adverse events were mild to moderate in nature; the most common events were headache (3%) and application site reactions including burning (6%), itching (1%) and dryness (1%).

## **Safety Information**

- No allergic reactions were reported in the Evoclin clinical trial.
- Evoclin is contraindicated in individuals with a history of hypersensitivity to preparations containing clindamycin or lincomycin, a history of regional enteritis or ulcerative colitis, or a history of antibiotic-associated colitis.
